GERMINATION TESTER

FOR
FIELD
VEGETABLE
FLOWER
TREE
SEEDS

SIMPLE
EFFICIENT
RELIABLE
ALWAYS READY

\$3.50

Price ~~■■■■■~~ per set, post-paid for U. S.

COMPOSED of an attractive flat dish, a porous disc with surface divided, to facilitate counting, in 10 sections of 10 compartments and ventilated clear glass bowl, the Tester presents an attractive appearance, and placed in office, store, or window, draws the public's attention; it demonstrates the good growth of your seed.

Seeds placed on the disc and kept moist by suction from water in the dish, germinate, in room temperature, more quickly than in other more elaborate and costly devices. Do not expose to the sun which causes sweat.

Keep all the parts clean, particularly the porous disc.

This Tester is used in the most renowned seed laboratories. We ourselves use it.

\$3.50

Price ~~■■■■■~~ postage prepaid.
